RE: Letter of Reference - Ingenuity Engineers, Inc.

To Whom It May Concern:

In connection with my position with the Indian River County School District, I have known Dave Green professional for approximately ten years. During this time I have always found his engineering and professional demeanor to be of the highest standard.

Recently, due to the increased electric utilities costs, the Indian River County School District decided to evaluate five of the district schools' Thermal Energy Storage systems and also ten of the district schools' HVAC systems for potential energy savings. Ingenuity Engineers, Inc. was selected to evaluate these facilities.

Ingenuity Engineers, Inc. performed the tasks quickly, competently and economically, providing precise written evaluation of each site, listing discrepancies/deficiencies, correction recommendations and analysis for energy payback.

I would highly recommend Ingenuity Engineers, Inc. for MEP services.

Thank you,

Al Payne

To Whom It May Concern:

RE: Letter of Reference - Ingenuity Engineers, Inc.

"...Ingenuity has proven to be the best selection for professional engineering services."

I have had the opportunity to work with Ingenuity Engineers for several years. Dave Green, Brian Hassinger and staff have been extremely pleasant, responsive, technically competent and "proactive" in their engineering endeavors. I have appreciated their professionalism while working on Okeechobee County School Board projects.

Although there are several other mechanical, electrical and plumbing firms closer to this school district, Ingenuity Engineers, Inc. has proven to be the best selection for professional engineering services.

Please feel free to call me at the letterhead number if additional information is needed.

Sincerely,

Dale Barrett
Director of Operations
